About CCMA

The India Construction Chemicals and services market is estimated at 3.30 billion USD in 2024, and is expected to reach 5.02 billion USD by 2030, growing at a CAGR of 7.24% during the forecast period (2024-2030). This growth is propelled by increased demand driven by substantial government investments in infrastructure and construction.

The construction chemical industry in India currently encompasses both organized and unorganized sectors. Leading manufacturers have collaborated to establish the Construction Chemicals Manufacturers' Association. The association's primary objective is to foster industry best practices, set quality standards, and promote innovation while actively advocating for the interests of the construction chemical sector with governmental and regulatory bodies.

Why Raipur?

Raipur, the capital of Chhattisgarh, has been gaining significant attention due to its resurgence in real estate, industrial, and infrastructural development. The city is now seen as a prime investment destination with an estimated GDP per capita of \$7,900. The Chhattisgarh State Budget 2023-24 has already allocated ₹4,344 crore (US\$ 528.3 million) for urban development in Raipur, with ₹1,596 crore (US\$ 194.1 million) for capital outlay. The city's diverse manufacturing sector includes agriculture, steel, coal, power, aluminium, alloy, cement., food processing, etc.

Why the Demand?

- Hosts 200 steel mills, 195 sponge iron plants, and major steel plants.
- The presence major cement companies like Ambuja, Lafarge, Century Cement, etc.
- Chemical plants in Raipur supply formalin nationwide.
- Nava Raipur and expansion into Durg and Bhilai drive residential property demand.
- Indus Best Mega Food Park boosts the food processing sector.
- CSIDC has set up industrial growth centres and parks in the city.

Emerging developments

- Three NH projects are in the construction phase, including a six-lane tunnel.
- Six-lane Greenfield Raipur-Visakhapatnam corridor is being developed for better connectivity.
- Planned Aerocity near Swami Vivekananda Airport for international flights and commercial development.
- Urla & Siltara are being developed as major industrial areas for heavy and medium industries.
- Bhanpur, Gondwara, and Birgaon are being developed as Industrial zones for medium and small industries.

Raipur's strategic urban growth, strong industrial base, significant government investments and growing real estate market make it an ideal location for organising a C3R conference.

WHY ATTEND THE CONFERENCE?

There is an increasing demand for advanced construction materials and technologies that can meet the challenges of modern construction. Understanding the latest advancements in construction chemicals helps local professionals and businesses improve construction practices, adhere to regulatory standards, and achieve long-term project success.
